## 1. The Power to Perform

With the latest AMD Ryzen Accelerated Processing Unit (APU) based on a Zen+ CPU and Vega GPU microarchitectures, this Chromebook can be awoken from sleep in less than a few seconds. With 10 hours<sup>1</sup> of battery life, it can easily be a workhorse that you can depend on.

1. Battery life may vary depending on model and configuration.

Based on Google power\_LoadTest

## 2. Superior Screen

Not only compact and lightweight, this Chromebook also allows you to extend your screen-to-body ratio to 78% with an ultra-narrow left and right bezel width of just 6.1 mm and immerse yourself in a stunning 14" FHD IPS display.

## 3. Outstanding Durability

The streamlined and reinforced metal chassis<sup>2</sup> design with diamond-cut patterning on both the top cover and touchpad delivers stylish good looks with additional military-grade durability (U.S. MIL-STD 810G compliant), allowing users on the move to focus on their work rather than the fragility of their device.

2. Only top and keyboard covers are metal.

#### 4. Everything You Need

Optimized for online collaboration and interaction, this Chromebook comes equipped with Wi-Fi 5 connectivity, concave keycaps for an improved typing experience, an optional backlit keyboard, dual microphones to better support Google Assistant, and dual USB Type-C ports to deal with everyday applications.

#### 5. Convenient Convertibility

Work the way you want. The 360-degree convertible use modes enable you to present or share your screen in more convenient and collaborative ways, while also allowing you work in areas with limited space such as on a plane or train.

#### 6. Ready to Present

No more dongles needed – unlike similar devices on the market, this Chromebook features a built-in HDMI port<sup>3</sup> providing your meetings and presentations with better contrast and color saturation over a typical analogue (VGA) interface.

3. Acer Chromebook Spin 514 with Ryzen 5 APU (1HH only) will have a built-in HDMI port. For other SKUs such as Ryzen 3, Athlon Silver will not have a built-in HDMI port.
